

Manual clipper KN-6R

The KOMPO KN-6R clipper is designed for manual clamping and single-sided clipping of polyethylene and paper bags, as well as tubular polyamide, cellulose, collagen, and fibrous casings, both without and with various fillers. The cut-off knife allows cutting the excess casing. If necessary, a twine loop can be manually fed under the clip for hanging sausage sticks.

Technical specifications

Model	KN-6R
Number of clips applied per 1 cycle	1
Type of clips *	B, BP
Casing caliber, mm	20-80
Cut-off knife	fixed
Dimensions, mm:	
Length* Width* Height	460*260*970
